TAAP FOUNDATION - THE GREEN PROJECT

Planting Fruit Trees in Rural India IN & The Gambia GM
SADAQAH JARIYAH - A Charity That Grows for Generations

THE NEED

In rural villages of India, The Gambia and Zimbabwe, families face barren land with no fruit, no shade, and no income. Children have limited access to nutritious fruit, and farmers have no sustainable source of food or livelihood.
Your fruit tree can change this for 20+ years.

THE PROJECT

TAAP Foundation is planting sustainable fruit trees:
Mango Trees - Rural India & The Gambia
Guava Trees - Rich in vitamins, fast growing
Papaya & Banana Trees - Quick yield, nutritious
Every tree provides food, oxygen, shade and income
Planted by local communities, monitored and reported

YOUR IMPACT - YOUR GIFT

Option	Description	Donation
1 Tree	Plant 1 fruit tree	£10
5 Trees	Small family orchard	£45
10 Trees	Grow a local orchard	£80
50 Trees - Full Orchard	Sustainable orchard for a community	£400

Hadith: "*If a Muslim plants a tree, whatever is eaten from it is charity for him*" - Bukhari & Muslim

WHY TAAP FOUNDATION?

100% Donation Policy
Sadaqah Jariyah - Reward continues for years
Planted in Rural India & The Gambia
Sustainably grown, monitored & reported
Registered UK Charity: 1144345
Website: https://taapfoundation.org.uk

HOW TO DONATE

The Ahmed Ali Petkar Foundation
Sort Code 40-11-43 Account Number 51447777 Reference: The Green Project

Subject: Help Us Sustain 16 Years of Lifesaving Work – Donate Today

Dear Supporter,

For over 16 years, The Ahmed Ali Petkar Foundation (TAAP Foundation) has been helping vulnerable communities across Rural India, The Gambia, and Zimbabwe. From building community centres to supplying clean water and providing vital medical care, your support has made incredible change possible.

To continue this vital work, we have launched a core funding campaign. Core funding is the heartbeat of our foundation—it pays for the dedicated team, community centres, operations, and everything that keeps our charity moving forward.

We invite you to visit our new campaign page and consider making a donation to help secure TAAP Foundation's future. Every gift, big or small, fuels hope and transforms lives.

Visit the Campaign Page and Donate Today

Thank you for your compassion and ongoing partnership. Together, we can ensure this important mission continues for many more years.

With heartfelt gratitude,

The TAAP Foundation Team

Our Mission

We aim to plant fruit trees to:

- **Provide fresh, nutritious fruits** to local communities, improving health and food security (33%).
- **Support poor families** by giving them access to fruit trees that can provide food and income (33%).
- **Reinvest in the project** to plant more trees and expand our impact sustainably (34%).

How You Can Help

Your support plants the seeds of change. Here's how your donation makes a difference:

- **£10 plants one mango tree** providing fruit for families and communities.
- **£100 plants 10 trees**, bringing fresh fruit and income opportunities to more people.

You can donate any amount to The Green Project to help us continue planting and nurturing these life-giving trees.

Donate Today

[**Plant a Tree – Donate Now**] (Insert your donation/crowdfunding link here)

Every tree you help plant is a step towards healthier, stronger communities and a greener planet.

Join the Green Movement!

Help us nurture these growing seeds of hope. Together, we can build a future where clean air, fresh fruit, and thriving communities go hand in hand.

The Green Project – Planting Fruit Trees & Creating Water Points
Transforming Barren Land into Thriving, Fruitful, Growing Nutrition, Hope & Sustainability in Rural Communities

The Green Project is an initiative by TAAP Foundation dedicated to improving nutrition, livelihoods, and the environment in The Gambia, Rural India, and Zimbabwe. By planting fruit trees and creating water points, we transform barren, dry land into productive, green spaces that bring lasting benefits.

Why Fruit Trees & Water Points?

Fruit trees like mangoes, guavas, and oranges improve health and food security, while water points are essential to:

- **Irrigate trees**, allowing them to grow in dry, barren soils.
- **Revive the land**, enhance soil quality, and improve the local environment.
- **Support community farming** and empower families to become self-sufficient.

Together, these efforts combat hunger, improve nutrition, and restore ecosystems.

Every contribution helps us turn barren land into thriving orchards that feed and empower communities.

Join Us in Renewing the Land and Lives!

Together, we can revive barren lands into fruitful landscapes that sustain generations.
